English

About Me

I am a motivated and fast learning full stack developer with a strong foundation in web development technologies including HTML,CSS, Javascript and backend tools like Node.js and MySQL. Recently completed hands-on project and eager to contribute to real-world applications in a collaborative and growth-focused environment.

Project

- Localens

     A localens is a digital platform designed to streamline the management and delivery of various local services such as plumbing, electrical repairs, cleaning and more. This kind of system helps improve the accessibility and organizations of local services, benefiting both customers and service providers. It connects service providers with customers in a specific area.

Front end:PHP
Backend: My Sql
